OVERVIEW OF CAMH

Working for Better Understanding, Prevention and Care

CAMH is the largest mental health and addiction facility in Canada and is recognized for its excellence. It was founded in early 1998 through the merger of the Addiction Research Foundation, Clark Institute of Psychiatry and, Donwood Institute, and Queen Street Mental Health Center and is affiliated with the University of Toronto. Since the merger, CAMH has focused on a seamless integration of addiction and mental health services in a functional and flexible environment. Internationally, CAMH has been designated by the World Health Organization as one of only four Centres of Excellence in mental health and addiction in the world. Through accessible treatment, community services, research, education and prevention, CAMH works to improve the quality of life for people who are struggling with mental illness or addiction and to support their family and friends.

“For me it was the courage, and I guess the courage comes from saying 'hey, let's make a change.' And the courage to continue to do that. It's so great now … it is so good for me now. I love my life.”

Susan E. Gapka, Courage to Come Back Award Recipient

Care

“One of the things about working with people who suffer from mental illness or people who struggle with addictions is that, to the public, this may seem like a discouraging environment – a place that's not filed with hope. But for those of us who work clinically, just the opposite is true. I find a great deal of professional fulfillment in this environment because many, many people get better.”

Dr. David Goldbloom, former Physician-in-Chief

CAMH is committed to providing comprehensive, well-coordinated, accessible care for people with addictions or severe mental illness. We have created a continuum of clinical programs, support and rehabilitation to meet the diverse needs of people who are at risk and at different stages of their lives and illnesses. Our services include assessment, brief early interventions, inpatient programs, continuing care, and family support. We also address the larger issues relating to the four major factors affecting health: housing, employment, social support and income support. Our client-centred philosophy of care recognizes that the client has individual social, physical, emotional, spiritual and psychological needs.

Mental Health

CAMH provides a wide range of inpatient, outpatient, and community-based treatment programs including: Child, Youth, and Family; Dual Diagnosis; General Psychiatry; Law and Mental Health; Mood and Anxiety; Schizophrenia; Work, Stress & Health, and others.
Addiction
CAMH's addiction treatment is based on a harm reduction philosophy, an approach that focuses on decreasing adverse health, social, and economic consequences of alcohol or drug use. Clients' goals range from reduced use to total abstinence. Concurrent Disorders programs offer an integrated treatment approach for people facing concurrent addiction and mental health problems.

Prevention
"Prevention involves a host of things. It's not just about preventing substance abuse or mental health problems. It's about supporting health and well-being and having environments that really are healthy environments."

Akwatu Khenti, former Director of Education and Training Services

CAMH is committed to working with communities throughout Ontario to create environments that support health and prevent illness. CAMH consultants work with individuals, local service providers and community groups to apply initiatives in the community and design evidence-based systems and approaches. Consultation, support, and training focus on preventing problems, promoting health and planning and delivering treatment. By providing information to the general public, we empower people with the knowledge to reduce the likelihood, recurrence and/or intensity of addiction or mental health problems for themselves or others.

Understanding
“Only through education can we hope to improve the understanding of mental health and addiction problems and thus foster support for people who struggle with these challenges.”

Dr. Paul Garfinkel, former President and CEO

One of CAMH's goals is to be a leader in creating, applying and disseminating knowledge. Each year, the Centre receives many research grants, fellowships and awards, resulting in the publication of hundreds of scientific articles and studies. Our research guides our public policy priorities and is transformed into practical resource materials and training programs, which inform the practice of professionals and help educate the general public. Advancing our understanding of mental illness and addiction is key to future improvements in prevention and clinical care. Working with communities, we aim to foster understanding and reduce the stigma associated with these illnesses.
OVERVIEW OF THE APPLICATION PROCEDURE

Clinical placements are available across a large number of specialty clinics, to be described below. All placements are for a minimum duration of **500 hours**, either on a part-time or full-time basis. Traditionally, placements are either 2-3 days per week from September to May, or 4-5 days a week from May to August. Other combinations are possible and at the student and supervisor's discretion.

The **DEADLINE FOR APPLICATIONS IS FEBRUARY 2, 2015** for Spring-Summer 2014 and Fall-Winter 2014-2015 placements. Applications submitted after this deadline will be reviewed after the Common Notification Day pending the availability of practicum spots (no exception and no phone calls or emails about exceptions please).

Applications are to include:
1) The completed application form (on the last 2 pages of this brochure)
2) A one page statement of training goals and objectives
3) An up-to-date curriculum vitae
4) Undergraduate and graduate transcripts (can be unofficial)
5) Two letters of reference (at least one from a professor; other can be work or volunteer supervisor)

Please assemble all materials (except reference letters) prior to submission, and email them to Dr. Niki Fitzgerald at niki.fitzgerald@camh.ca. Please ask referees to email reference letters with the name of the applicant in the subject line.

Once your completed application is received, the Practicum Committee will review the submission. If deemed appropriate, your application will be sent to potential supervisors who may contact you for an interview. Most interviews take place within 4 weeks of the application deadline.

CAMH participates in **Common Notification Day** with other GTA sites. You will be notified that day if we are offering you a placement. **If your university does not have an affiliation agreement with CAMH, this will need to be obtained before your acceptance.**
OVERVIEW OF CLINICAL ROTATIONS

---CHILD, YOUTH AND FAMILY TRACK---

The Child, Youth, and Family (CYF) Program is newly organized, incorporating the former Child Psychiatry Program and the Youth Addictions Service, both long-standing services at the Centre for Addiction and Mental Health.

Assessment and psychological testing includes objective tests, projective tests, observational techniques, psychoeducational assessment, and structured diagnostic interviews. Such training includes development of integrated psychological report writing and the process of providing clinically sensitive feedback to parents and children. Therapeutic approaches rely on empirically-validated and best-practice models of intervention. These include individual psychotherapy, group therapy, family therapy, and parent counseling in various modalities (e.g., cognitive-behavioral, behavioral, psychodynamic, solution-focused and strength-focused, and core conflictual relationship therapy). Preventative programs in school and community settings also exist. Services within the CYF often work within a multidisciplinary team of psychologists, psychiatrists, social workers, nurses, and child and youth workers. Thus, practicum students are able to enhance their understanding of the roles of multiple disciplines and develop skills in working together constructively.

Practicum students will receive intensive training in clinical assessment and diagnosis, psychological testing, consultation, and therapeutic intervention. Such training includes experience in clinical interviewing of children, youth, and their families, and diagnostic formulation, which includes a strong focus on the use of the DSM-IV-TR. The program also serves a diverse and multicultural population, giving the practicum student an awareness of their own personal and professional strengths, limitations, and areas of growth as a clinician, while developing the knowledge, sensitivity, and skills needed to work with diverse populations.

Training staff have a variety of theoretical interests, including attachment theory, the interface between developmental psychology and psychopathology, and evolutionary psychology.

ADOLESCENT SERVICE

Supervisor: Tracey A. Skilling, Ph.D, C.Psych.

The Adolescent Service works with youth aged 12 to 19 years old. These youth are often actively involved in the juvenile justice system or have other legal issues. Mental health, psycho-educational, and risk-to-reoffend assessments are completed with recommendations offered to the courts, families, and other involved agencies. The clinic also, on occasion, provides similar assessment services to youth not involved in the juvenile justice system who have problems with behaviour such as anger, aggression, or sexual misconduct.
This rotation exclusively provides assessment services; comprehensive treatment plans are developed but not offered by the Service, instead treatment referrals to community agencies are suggested. Practicum students have the opportunity to be involved in psycho-diagnostic assessments, psycho-educational assessments, and feedback to clients, families and referral agents. Assessments are often completed as a multidisciplinary team and students will have opportunities to work closely with professional from other disciplines including psychiatry and social work.

Students may also have the opportunity to be involved in clinical research projects underway in the Service.

**BETTER BEHAVIOURS SERVICE**
Supervisor: Brendan Andrade, Ph.D., C.Psych.

The Better Behaviours Service (BBS) provides help for children, youth and their families who have challenges with disruptive behaviour, aggression, social skills difficulties, inattention and non-compliance at home and/or at school. Through semi-structured assessment, factors contributing to behavioural difficulties are identified. Individual, family and group based treatments are offered to help children build skills, reduce behavioural difficulties and help caregivers develop more effective parenting strategies to reduce family conflict. The BBS also offers a 10-month (i.e., an academic year) day treatment program for children aged 6-8 with severe behavioural challenges. Day treatment occurs in conjunction with family and group based therapy. Throughout the practicum students interact with an interdisciplinary team of professionals (i.e., Social Work, Child and Youth Work, and Psychiatry).

This is a clinical-research practicum. Students will be involved in assessment, detailed clinical formulation, intervention and consultation in the context of one or more clinical-research projects operating within the BBS. Students will also provide treatment for children in the day treatment program. Students complete brief assessments and participate in delivery of structured group, individual and parent-child treatment. Training and supervision of implementation of Cognitive-Behavioural treatment and other evidence-informed approaches will be provided.

Note: This is an intervention practicum. Only students who have completed an assessment practicum will be considered for this rotation.

**GENDER IDENTITY SERVICE**
Supervisors: Kenneth J. Zucker, Ph.D., C.Psych.
Hayley Wood, Ph.D., C.Psych. (on parental leave)

The Gender Identity Service helps children, adolescents, and families better understand a young person’s struggle with gender identity development and related behavioural or emotional problems. Many children and youth seen in this clinic are confused about their gender identity or are unhappy about being a boy or a girl. The clinic also assesses
children and youth exhibiting inappropriate and/or highly sexualized behaviour, as well as adolescents who are concerned about being sexually aroused by cross-dressing.

Treatment modalities are informed by models of developmental function and psychopathology. Diagnostic case formulations tailor the therapeutic modality and approach, which include supportive psychotherapy, psychodynamic therapy, attachment-based therapy, and parent counselling. We typically provide weekly long-term treatment to our clients. A key element in the training experience of the practicum student is to develop empathic skills and to understand better the internal representational world of their clients. Practicum students will have the opportunity to be involved in diagnostic assessments, psychological assessments, feedback to clients, families and referral agents, and as well in individual, family and parent therapy. Students may also have the opportunity to be involved in clinical research projects underway in the Service. Assessment and treatment initiatives are undertaken within the framework of a multidisciplinary team approach, and students work closely with the professionals from other disciplines (e.g., psychiatry, social work, and endocrinology) in the provision of services.

**MOOD AND ANXIETY SERVICE AND YOUTH ADDICTION AND CONCURRENT DISORDERS SERVICE** (Only available for Fall-Winter Practicum)

This singular rotation has two services, where practicum students would spend one day a week in each.

The Mood and Anxiety Disorders Service helps children and adolescents aged 5-18 who have anxiety and/or depression, as well as their families. Students participate in clinical diagnostic as well as psychoeducational assessments. Where appropriate, treatment is recommended and can be provided within the service. Treatment goals are to reduce the client's anxiety or improve their mood so that he or she is better able to cope at home, school, and with friends.

Treatment is provided in the form of individual, family, or group therapy, as well as parent counseling or individual therapy to parents. Treatment modalities include cognitive behaviour therapy, dialectical behaviour therapy, play therapy, and psychodynamic therapy.

The Youth Addiction and Concurrent Disorders Service is a harm reduction service that helps adolescents and young adults aged 14-24 who have substance use problems, with or without mental health concerns, such as problems with mood and anxiety, disruptive behaviour, attention difficulties, eating disorders, psychotic disorders, learning disorders, adjustment disorders, and personality disorders. Psychology practicum students become involved in psychoeducational assessments, feedback to clients, families, and referral agents, as well as individual and group therapy [First Contact, a brief group with a motivational interviewing focus; C-Smart for youth struggling with substance use and mood and/or anxiety difficulties; Dialectical Behaviour Therapy-Skills
Treatment modalities include cognitive behaviour therapy, dialectical behaviour therapy, motivational interviewing, supportive, and psychodynamic.

This practicum is limited to doctoral-level students.

**PSYCHOLOGICAL ASSESSMENT TEAM FOR CHILDREN AND YOUTH SERVICE**  
(Only available for Fall-Winter Practicum)  

Psychometry service offers students opportunities for conducting comprehensive psychological assessments for children and youth (age 4-17) who are referred internally within the Child, Youth and Family Program. Assessments are typically requested for psycho-educational, socio-emotional, and psycho-diagnostic considerations.

Practicum students will gain experience with regard to clinical and diagnostic interviewing, administering and interpreting standardized psychological assessment measures and tests, integrating clinical information with psychological test data, and provision of written and verbal feedback to clients, families, and referring agents.

Assessment tools include cognitive measurement, academic testing, assessment of learning, memory, and language, as well as socio-emotional, personality, and projective measures. Practicum students are trained via individual supervision and group supervision.
AMBULATORY CARE AND STRUCTURED TREATMENTS PROGRAM

Mood and Anxiety Ambulatory Services
Mood and Anxiety Ambulatory Services

Supervisor Dr. Judith Laposa

The Mood and Anxiety Ambulatory Services is a clinical and research unit staffed by individuals from a wide range of disciplines including psychology, psychiatry, social work, nursing, and occupational therapy. Our service is a high demand out-patient treatment service that offers specialized training in empirically supported treatments, namely in short-term cognitive behavioural therapy for mood, obsessive compulsive related, and anxiety disorders (clients receive treatment lasting for 12-15 weeks) as well as relapse oriented treatment (mindfulness-based cognitive therapy (MBCT). This rotation offers experiences with mood, obsessive compulsive related, and anxiety disorders.

A main focus of the practicum rotation involves collaborating with clinical practicum students in order to further develop their ability to provide a comprehensive multi-axial diagnosis, while considering optimal treatment suitability (e.g., considering the client’s level of functioning, treatment modality, treatment format, acute phase treatment vs. relapse prevention treatment). Practicum students will gain proficiency in the administration of the Structured Clinical Interview for the DSM-5 (SCID-5) and they will also learn to administer the treatment suitability interview for determination of suitability for short-term cognitive-behavioural treatment. In addition, there is a strong emphasis on the importance of case formulation skills, in order to optimally apply CBT principles to complex diagnostic presentations.

Practicum students have the opportunity to co-lead CBT treatment groups for depression, panic disorder, generalized anxiety, social phobia, and obsessive-compulsive disorder during the rotation, as well as transdiagnostic groups. Supervision includes direct individual supervision, and weekly clinical rounds that include all clinic staff. Practicum students may have additional opportunities to work with other disorders that interface with mood, obsessive compulsive related, and anxiety disorders, as opportunities arise.

Practicum students will develop clinical decision making skills, learn how to effectively communicate/collaborate with other health professionals, and train in empirically supported treatments. Practicum students are valued members of the treatment team, and they become familiar with the relevant clinical and research literature. Related training goals involve understanding the role of
cognitive vulnerability factors, while considering the interaction between pharmacotherapy and psychological treatment of the disorder.

In addition to offering clinical services, the Mood and Anxiety Ambulatory Services is an active research centre. Depending on the practicum student’s interests and experience, opportunities to participate in clinical research projects may be available as time permits.

**Alternate Inpatient Milieu**  
**Supervisor: Adele Efendov, Ph.D., C. Psych.**

The Alternate Inpatient Milieu (AIM) is a 24-bed inpatient unit that provides treatment to individuals with mood and anxiety disorders who require more intensive care. Clients are admitted for a stay of up to 28 days and receive multidisciplinary treatment from staff members including psychiatrists, psychologists, social workers, occupational therapists, and recreational therapists. Practicum students will have an opportunity to provide brief group and individual psychotherapy (up to eight individual sessions of Cognitive Behavioural Therapy or Interpersonal Therapy), as well as provide psychodiagnostic assessments (e.g., SCID-I). In addition to weekly individual supervision, practicum students will attend weekly rounds where they will present cases and receive feedback from the treatment team. Practicum students may also have an opportunity to observe or co-facilitate psychotherapy groups in the Day Treatment Program.

Applicants are required to have completed a Masters level practicum. Previous experience providing CBT is an asset.

**CENTRALIZED ASSESSMENT, TRIAGE & SUPPORT (CATS)**  
**Borderline Personality Disorder Clinic**  
**Supervisors:** Shelley McMain, PhD., C.Psych.  
Michelle Leybman, PhD., C.Psych.  
Tali Boritz, PhD., C.Psych.

The Borderline Personality Disorder (BPD) Clinic is an outpatient program serving multi-disordered individuals with borderline personality disorder who are 18 years or older. The clinic offers specialized training in the delivery of Dialectical Behaviour Therapy (DBT). The standard DBT modes of therapy offered in the clinic include weekly individual, group skills training, after-hours telephone consultation, and therapist consultation. Trainees may also have the opportunity to participate in adaptations of traditional DBT. Current adaptations include a DBT skills-only group, as well as a DBT component of an Intensive Day Treatment program. Family skills groups are also offered.
In this rotation, trainees primarily gain experience in delivering DBT individual and group skills training, as well as crisis management through a pager system. Trainees may also be involved in conducting diagnostic assessments (including self-harm and suicide risk assessments). Additionally, trainees participate in a weekly therapist consultation team meeting. Trainees are expected to become familiar with the relevant research in the area of BPD and BPD treatment. The BPD Clinic is an active clinical, research, and training centre. Research interests of the team include the evaluation of treatment outcome, the relation of psychotherapy process to outcome, and the role of emotion in psychotherapy. Participation in research activities is available as time permits.

This practicum is limited to doctoral-level students. Previous experience working with complex clients is an asset.

**Gender Identity Clinic**
Supervisors: Nicola Brown, Ph.D., C.Psych.
Barbara Mancini, Ph.D., C.Psych

The Gender Identity Clinic (GIC) is an outpatient clinic that evaluates adults (18 and over) who are referred because of gender dysphoria. The GIC sees individuals who are considering or pursuing a social and/or medical transition, as well as individuals who elect to manage and/or express feelings of dysphoria while remaining in their original gender role. CAMH’s Adult Gender Identity Clinic is currently the only Clinic in the province empowered to carry out the Ministry of Health’s approval process for individuals in Ontario seeking an OHIP-funded sex reassignment surgery (SRS). As such, we see a wide diversity of clients, with presentations across a spectrum of diagnostic categories and levels of functioning, including complex cases.

The Clinic offers students specialized training in diagnostic and life history interviewing that emphasizes a holistic understanding of a person. The results of these assessments enumerate relevant diagnoses and for those seeking medical interventions, evaluate a person’s eligibility and readiness using the principles articulated in the current World Professional Association for Transgender Health (WPATH) Standards of Care (SOC 7). Trainees will conduct initial clinical assessments, as well as follow-up and surgery approval appointments. Trainees will also have the opportunity to provide time-limited individual psychotherapy and other relevant support where indicated. Trainees will become familiar with the literature, receive weekly individual supervision, and participate in weekly case conferences that include all clinic staff. Participation in research activities is available when there are active projects and as time permits.

Psychology students at the Doctoral level are welcome to apply; familiarity with LGBT communities is preferred.

**SCHIZOPHRENIA PROGRAM**
Through its 200+ inpatient beds and 15 ambulatory services, the Schizophrenia Program provides care at all stages of the illness. Services include prevention, treatment for first episode psychosis, Medication Assessment Program for
Schizophrenia (MAPS), monitoring and management of co-occurring metabolic problems, rehabilitation, and care for adults with severe and persistent mental illness.

**Assessment Service**  
Supervisors: Sylvain Roy, Ph.D., C.Psych.  
Yarissa Herman, D.Psych., C.Psych.  
Sean Kidd, Ph.D., C.Psych.

Practicum students will have the opportunity to participate in the Schizophrenia Program psychological assessment service. In this service they will gain experience in clinical interviewing, administering and interpreting psychological and neuropsychological assessment tools, writing comprehensive assessment reports, and providing feedback to clients, family members, and service providers. Assessments address questions related to community functioning (e.g., psycho-educational and psycho-vocational assessments) and issues of diagnosis and comorbidity among persons with psychosis. Weekly supervision meetings will be held with students and there are opportunities to attend a range of clinical rounds and interdisciplinary team meetings.

**Cognitive Behaviour Therapy Service**  
Supervisors: Faye Doell, Ph.D., C.Psych.

The rotation in the Cognitive Behaviour Therapy Service of the Schizophrenia Program offers a unique training opportunity for students who are interested in gaining experience working therapeutically with individuals with severe and persistent mental illness. Practicum students will receive intensive training in CBT for Psychosis, and will have the opportunity to participate in weekly individual supervision as well as group supervision with a multidisciplinary team of clinicians. Students will carry a small caseload of individual clients, and will also have the opportunity to participate as co-facilitator of CBT for psychosis therapy groups offered through both our outpatient services and Partial Hospital Program.

**LAW AND MENTAL HEALTH PROGRAM**  
The Law and Mental Health Program was one of the first forensic centers established in Canada and continues to be at the forefront of research and treatment innovations. The Law and Mental Health Program specializes in the assessment and treatment of individuals who have ongoing involvement with the legal system.

**Adult Forensic Outpatient Service** (Only available for Fall-Winter Practicum)  
Supervisor: John Arrowood, Ph.D., C.Psych.

The Adult Forensic Outpatient rotation is part of the CAMH Forensic Division of the Complex Mental Illness Program (previously the Law and Mental Health Program) and is one of the first forensic centers established in Canada (as part of the Clarke Institute of Psychiatry) and continues to be at the forefront of research and treatment innovations.
The Adult Forensic Outpatient rotation takes place on a clinical and research outpatient unit which specializes in the assessment and treatment of individuals involved in the criminal justice system. Practicum students also have the opportunity to take on specialized assessments within the Psycholegal Assessment Clinic. Clinical activities in which practicum students are involved include diagnostic and sexological assessment, assessment of psychopathic personality, clinical and actuarial assessment of risk for reoffense, assessment of malingering, and assessment of Posttraumatic Stress Disorder. Practicum students will become familiar with the psycholegal standards in forensic practice and in reporting to probation and parole officers, attorneys, and the courts. Interns also take on individual psychotherapy clients and run treatment groups in the sex offender treatment program.

Supervision is provided on an individual basis as well as in team meetings and case conferences. Additionally, students will have the opportunity to attend Forensic Division seminar series. Possibilities also exist for participation in clinical research as time permits.

**Adult Forensic Inpatient Service**  
Supervisor: Percy Wright, Ph.D., C.Psych.

The Law and Mental Health Program is comprised of several assessment and rehabilitative inpatient units that serve mentally ill individuals who are involved with the legal system. Relevant legal issues include clients’ fitness (competency) to stand trial and/or their criminal responsibility (legal defense) for their crimes. 

Specialized clinical activities in which practicum students are involved include the assessment of intellectual, cognitive, and neuropsychological functioning, personality, and malingering. In addition, practicum students would have the opportunity to learn necessary skills for the assessment of psychopathy and risk for future offending.

Students will become familiar with the psycholegal standards involved in forensic assessment and reporting to the courts; in addition, he or she will be preparing clinical reports for relevant legal bodies, such as the Ontario Review Board, that guide and monitor the supervision and clinical care of our rehabilitation clients. Opportunities for individual and group therapy are available on a variety of topics (e.g., substance abuse, anger management, risk management, symptom management) according to students’ interests. Supervision is provided on an individual basis.

**Adult Sexual Behaviours Outpatient and Inpatient Service**  
Supervisor: Ainslie Heasman, Ph.D., C.Psych

The Sexual Behaviours Clinic (SBC) is part of the CAMH Complex Mental Illness Program (formerly the Law and Mental Health Program). The SBC Outpatient unit specializes in the assessment and treatment of individuals with sexual behaviour problems. Some individuals will have had previous contact with the legal system which
results in their referral to the SBC, while others have self-identified concerns over sexual behaviour and/or interests.

The Inpatient Forensic Service provides a secure setting for individuals found unfit to stand trial or not criminally responsible as a result of significant mental health issues. As a result, these individuals are under the auspices of the Ontario Reviews Board (ORB). Some of these individuals have engaged in sexually problematic behaviour.

Students typically engage in sexological and diagnostic assessments of individuals in both the inpatient and outpatient context. Treatment groups for sexual behaviour problems are provided to both inpatient and outpatient groups and students can participate in co-facilitation. There is the opportunity for individual therapy cases as well, addressing the same presenting sexual behaviour problems. The SBC also provides group treatment for Hypersexuality, and students have the opportunity to engage in assessment and treatment in this area as well. Students will become familiar with the psycholegal standards involved in forensic assessment.

Supervision is provided on an individual basis, as well as in team meetings and case conferences. Students will also have the opportunity to participate in various departmental and hospital wide seminars. Both Summer and Fall/Winter placements will be considered.

**Clinical Sexology Program** (Not offered for 2015-2016)
Supervisor: James Cantor, Ph.D., C.Psych.

At the start of the placement, students focus on assessment, using standardized instruments (primarily neuropsychological) with patients undergoing sexological assessment in the Kurt Freund Laboratory. The patients include those being referred after having committed one or more sexual offenses (e.g., sexual interference with a child, sexual assault, or possession of child pornography) and potentially paraphilic individuals who report difficulty integrating their sexual interests into their lives in a healthy manner. The placement is ideal for students pursuing or considering careers in either forensic psychology, neuropsychology, or sexology.

Students typically assess approximately 75 patients over the course of the placement. Trainees often report that the structured nature of the assessments is helpful at the pre-doctoral stages of their training and that the high volume of assessments has been very useful experience for subsequent clinical placements.

As the term progresses, students may begin to participate in psychotherapy groups, according to their prior experience and their home programs’ requirements. Previous students have received additional training in gender identity concerns and transsexualism through arrangements with the Gender Identity Clinic of the Centralized Assessment and Treatment Services of CAMH). Other trainee activities include participation in clinical case conferences and attendance at departmental and hospital-wide functions.

For more information, see [http://individual.utoronto.ca/james_cantor](http://individual.utoronto.ca/james_cantor).
WOMEN’S PROGRAM
Supervisor: Donna Akman, Ph.D., C. Psych.

The Women’s Program offers services for women with complex mood and anxiety disorders who often have a history of trauma and/or addictions. The program provides both inpatient and outpatient treatment. The approach is trauma-informed and integrates psychotherapeutic, psychopharmacological, and psycho-educational modalities of care. The Women’s Program is staffed by an interdisciplinary team from psychiatry, psychology, nursing, occupational therapy, therapeutic recreation, and social work.

Clinical activities in which students are involved include providing time-limited individual outpatient therapy, co-facilitating inpatient and outpatient groups, and conducting psychodiagnostic assessments. Students are expected to participate in clinical rounds, team meetings, and educational events.

This program only offers Fall and Winter placements. Applicants should be enrolled in a Doctoral level program.

WORK, STRESS, AND HEALTH PROGRAM
Supervisors: Rixi Abramhamsohn, Ph.D., C. Psych
Mark Bartoshuk, Ph.D., C. Psych
Hester Dunlap, Ph.D., C. Psych
Michelle Carroll, Ph.D., C. Psych
Donna Ferguson, Psy.D., C. Psych
Niki Fitzgerald, Ph.D., C. Psych
Longena Ng, Ph.D., C. Psych. (on parental leave)

This rotation is conducted in the Work, Stress and Health Program (WSH) of the Mood and Anxiety Program. The WSH is a large multidisciplinary outpatient clinic that provides comprehensive independent assessment and treatment for individuals who develop primary anxiety or mood disorders in response to workplace related traumatic events.

The program provides students with the rare training opportunity to conduct independent comprehensive psychodiagnostic assessments for third parties within a civil-legal context. These assessments involve the thorough evaluation of Axis I psychopathology, Axis II personality pathology, normal personality, and response style distortion (i.e. malingering or defensive responding) utilizing structures and semi-structures interviews (e.g. SCID-I, CAPS, SIPD, M-FAST, SIRS), as well as self-report psychometrics (e.g., MMPI-2, PAI, NEO PI-R). The WSH assessment service sees a wide range of diagnostic presentations, but the majority of those assessed suffer from anxiety (e.g. PTSD, Panic Disorder), mood, and somatoform disorders. The WSH treatment service specializes in the treatment of primary anxiety and mood disorders.
(PTSD, depression and a range of other anxiety disorders) utilizing CBT. In addition to receiving supervision in the provision of individual evidence based CBT protocols for anxiety and mood disorders, students will have the opportunity to actively participate in our group program as well.

Both the assessment and treatment services function within a multidisciplinary team approach and students work closely with the professionals from other mental health disciplines (e.g. psychiatry, occupational therapy) in the provision of services. WSH clients are of diverse ethno racial and cultural backgrounds. Students will participate in the clinic’s regular clinical and educational rounds.

Psychology students at the Doctoral level are welcome to apply.

**CLINICAL RESEARCH**
(Only available as part-time, eight month practicum)

Supervisor: Lena C. Quilty, Ph.D., C.Psych.

This rotation is conducted in the Clinical Research Laboratory (CRL) at the College Street site. The CRL is a dynamic, integrated clinical, research and training setting, conducting a variety of basic clinical research and treatment outcome studies each year. The CRL receives an average of 450 referrals for basic clinical research studies per year, principally involving one- to two-day psychological assessments of mood, anxiety, substance use, impulse control and personality disorders. The CRL further receives an average of 470 referrals for treatment outcome studies per year, principally involving pharmacotherapy and psychotherapy, such as manualized cognitive behavioural therapy or behavioural activation, for depression and/or addictive disorder. The CRL also provides consultation and training to other mental health professionals. Practicum students may be involved in assessment and/or therapy, as determined by student training, experience and interests, as well as current research initiatives and opportunities.

Assessment practicum students receive in-depth training, supervision and experience in psychodiagnostic assessment, including the *Structured Clinical Interview for DSM-IV, Axis I Disorders, Patient Form* (SCID-I/P; First et al., 1995). Students also receive training in structured interview, self-report, and performance-based measures of psychopathology, personality, cognition, impairment, and response bias. Supervision is provided on an individual basis. Training and supervision experience may be available for advanced students. Therapy practicum students receive in-depth training, supervision and experience in the provision of cognitive behavioural therapy or behavioural activation. Opportunities may also exist for time-limited supportive therapy. Supervision is provided on an individual basis. Peer observation and educational events may also be available. Practicum students will develop specific skills in empirically validated instruments and techniques, as well as general skills in clinical interviewing and decision making and effective communication with other health professionals. Opportunities to participate in research projects may be available, time permitting.
CLINICAL PRACTICUM FACULTY SUPERVISORS

Rixi Abrahamsohn, Ph.D., C. Psych., University of Toronto, 2008. Clinical Interests: Diagnostic assessment; assessment of malingering; individual and group cognitive behavioural therapy for depression and anxiety disorders, with a particular interest in the treatment of OCD and PTSD.

James M. Cantor, Ph.D., C.Psych., McGill University, 1999. Dr. Cantor’s clinical activities focus primarily on the assessment of persons dealing with illegal or clinically significant sexual behaviours and interests such as pedophilia and other paraphilias, (so called) sexual addictions, and persons with sexual orientation or gender identity concerns. His program of research investigates the biological contributors to sexual orientation, gender identity, and paraphilic sexual interests, using a variety of brain imaging, neuropsychological, and psychophysiological techniques. He also founded and manages the NewPsychList, an internet discussion list for over 4,500 recent and soon-to-be doctorates in psychology. More information available at http://individual.utoronto.ca/james_cantor.
Michelle Carroll, Ph.D., C. Psych., University of Windsor, 2006. Clinical and Research Interests: assessment and treatment (both individual and group) of depression and anxiety-spectrum disorders with a particular interest in PTSD and comorbid personality issues.

Adele Efendov, Ph.D., C. Psych., University of Toronto (OISE), 2006. Clinical and Research Interests: Assessment and treatment of mood and anxiety disorders with Cognitive Behavioural and Interpersonal Therapy (individual and group format), objective personality assessment, assessment of PTSD and malingering.

Michelle Leybman, Ph.D., C.Psych., McGill University, 2013. Clinical Interests: treating individuals with borderline personality disorder and focusing on co-morbid diagnoses (e.g., eating disorders and anxiety disorders) when needed. Research Interests: motivation and commitment to change, factors that help create and maintain a positive therapeutic relationship, and the efficacy of brief interventions for treating self-harm behaviour.

Lena C. Quilty, Ph.D. University of Waterloo, Clinical and research interests: include psychological assessment and treatment of mood and anxiety disorders. Research interests include the role of personality and cognition as mediators and moderators of treatment outcome in depression, the hierarchical structure of personality and psychopathology, and the psychometric evaluation of measures of psychopathology and other individual difference variables.

Sylvian Roy, Ph.D., C.Psych. University to Montreal, 2011. Clinical interests: Neuropsychology and Neurorehabilitation. One of my roles will be to assess patients for brain injury and/or neurocognitive impairments stemming from complex medical
conditions / concurrent disorders in addition to schizophrenia. Neurorehabilitation efforts may focus on cognitive remediation and/or compensation. Supervision can be offered in French or English.

   E-Mail Address:

2. Educational Background

   University Completion   Dates of Attendance   Degree Granted/
   Major Expected

3. Name, Address, Telephone Number, and E-mail of your Director of Clinical Training
4. Fall-Winter Practicum ___  Spring-Summer Practicum ___
   Anticipated start of practicum: ________________________________

5. Based on the aforementioned descriptions provided, please rank order of the
   following rotations you would be interested in participating in (e.g., 1= 1st choice
   [most preferred rotation], 2= 2nd choice, 3= 3rd choice, etc.).

Please note that there are:
   (1) Child, Youth and Family, and
   (2) Adult rotations

It is possible but unusual for candidates to have in-depth training in both child
and adult work. If you have both, you may rank across Child and Adult tracks.
Otherwise, you should rank within one track only.

You do not have to rank as many as 3 services (only rank those in which you are
interested), but please do not rank more than 3 choices in total.

   CHILD, YOUTH AND FAMILY TRACK

Adolescent Service
Better Behaviours Service
Gender Identity Service
Mood and Anxiety Disorders Service & Youth Addiction and Concurrent Disorders Service
Psychological Assessment Team for Children and Youth

   ADULT TRACK
