LEADERSHIP MEETS RESEARCH IN EARLY CHILDHOOD

Early Childhood Leadership Research Symposium

Sharing Knowledge and Expertise

Sheridan College
12 April 2013

Carl Corter
Dr. Eric Jackman Institute of Child Study
University of Toronto
TODAY’S TALK

• It’s all about you (well, maybe not “all”)
• Views on Leadership
• Views on Research in EC
• Our research on integrated care & education: does it help us understand “leadership”?
• Conclusion
LEADERSHIP: VIEWS FROM LEADERS

Margaret Thatcher,
Kathleen Wynne, &
Jim Grieve

_on leadership_

- “I won’t be doing this alone”
- “If you want something said, ask a man. If you want something done, ask a woman”
- “It’s both management & understanding”
Only a few said that a leader’s main role was to 'attend to the physical, social and emotional welfare of the children and to generate the right kind of atmosphere and environment for learning' and 'organising and planning the nursery curriculum'.

Some mentioned additional roles, including “reading” and “awareness” of research.
Many more reported a leader’s main role was:

- managing & supervising staff (34.2%);
- contact with parents & agencies (22.4%);
- staff support & development (15.8%);
- managing the budget (10.6%); &
- co-ordinating centre events (10.8%).
LEADERSHIP: VIEWS FROM EC PRACTICE

Adults with Kids:

• Leading from behind (kids)/Following their lead
• Leading from the front (of kids or classrooms)
• Leading with (interactions that turn kids into leaders).
VIEWS ON RESEARCH FOR EARLY CHILDHOOD

• Practitioners and policy makers as consumers
  • For “understanding”
  • For “evidence-based” practice & programs

• Informing Communities of Practice/Learning

• Action Research

• The Practitioner-Researcher model
LEADERSHIP: VIEWS FROM OUR RESEARCH

Integrated Care, Education, & Family Supports in TFD: “Toronto First Duty”
LEADERSHIP: VIEWS FROM OUR RESEARCH

What do children’s experiences and interactions with adults look like inside full-day, play-based programs in TFD & FDELK? How do our findings connect to leadership?

- Method is direct observation
- Systematic sampling and analysis
- Interactions may tell us about leadership
Children’s experiences vary by context:

![Bar chart showing children’s level of engagement in four different contexts](chart.png)

- **Transitions**
  - Not Engaged: 5%
  - Somewhat Engaged: 45%
  - Very Engaged: 50%

- **Play**
  - Not Engaged: 15%
  - Somewhat Engaged: 35%
  - Very Engaged: 50%

- **Small group instruction**
  - Not Engaged: 15%
  - Somewhat Engaged: 20%
  - Very Engaged: 65%

- **Whole group instruction**
  - Not Engaged: 10%
  - Somewhat Engaged: 20%
  - Very Engaged: 70%
What educators do varies by context.....

Average Frequency of Interaction Type per Context

- Small Group
- Whole Group
- Transition
- Play

- Instruction
- Affection/Praise
- Social Interaction
- Behaviour Management
- Play Extension

What educators do varies by context....

Small Group
Whole Group
Transition
Play
What makes TFD & FDELK effective?

- Cohesive staff teams with a focus on results
- Parent support and engagement
- Great Leadership with a focus on kids, quality, teamwork, community engagement, and knowledge building
CONCLUSION

- You can be a leader in many different ways
- You don’t need the title to lead
- Distributed leadership and empowered communities include children
- Research with shared ideas and analysis can be powerful
CONCLUSION

Merging leadership and research

- Facilitating communities of practice/learning
- The Practitioner-Researcher-Leader
- Life long learning

Enjoy your day!

Thanks!
