#### Research

- Employment and labour market

### **Resource Type**

- Journal article

### **Intended Audience**

- Policy makers
- Researchers
- Internationally educated professionals
- General public

### **Summary of content / Abstract**

The study has two aims. First, it seeks to examine and compare labour market integration rates in the first five years of arrival for *all categories* of recently arrived degree-qualified migrants in Canada and Australia. The second aim of the study is to assess *economic* migrants' labour market outcomes in Canada and Australia, in the context of similar economic cycles.
